

B.TOX.BAR.

Numbing Cream Application Instructions

About Numbing Cream

Numbing cream should be applied prior to microneedling, lip filler or other treatments. If you tend to have more sensitive skin, please inform our office.

Pre Treatment Instructions

- Apply a thin layer of numbing cream 1 hour before your microneedling procedure and 20 minutes prior to your lip filler treatment.
- The numbing cream will be removed at B.TOX.BAR. prior to your procedure.
- Mild redness of the skin is normal. If for any reason, you experience significant itching or burning when the numbing cream is applied, please rinse the cream off immediately and inform us when you arrive for your procedure.

How to Apply

- **Face:** Apply to full face.
- **Lips:** Apply to the lips and 1 cm around your lips. (In some cases you may notice your tongue or throat feeling numb, please avoid talking, eating, drinking or licking your lips)
- **Neck:** Apply numbing cream from your jawline down to the front of the neck.
- **Chest:** Apply numbing cream to the mid decollate.

If you have questions regarding the application of your numbing cream, please call or text our office at 408-516-1414.
